

# Consulting

Engineering · Finance · Technology

*Powering Africa's growth, one project at a time.*

# of infrastructure, finance, and technology, built for West Africa.

Nimba Consulting is a West African advisory firm founded by engineers, auditors, and technologists from the diaspora. We bring international standards to regional challenges, supporting governments, development partners, and private sector clients in Guinea, Côte d'Ivoire, Senegal, and Ghana.

 Guinea    Côte d'Ivoire    Senegal    Ghana

# Three disciplines. One standard of rigor.

**01**

---

## Engineering

Infrastructure planning, inspections, design reviews, and QA/QC, including rural roads, bridge load-rating, and safety assessments.

**02**

---

## Finance

Accounting, internal controls, governance frameworks, and transparent reporting tailored to donor-funded and African institutional contexts.

**03**

---

## Technology

Digital infrastructure, data workflows, and systems integrations that enable lean teams to deliver programs at scale.

## Safe infrastructure, delivered right the first time.

We provide independent engineering oversight so public investment is protected and communities receive assets built to last.

### Safety

Risk assessments, HSE programs, and site compliance for infrastructure and operations.

### Inspection & Design

Certified structural inspections, load-rating analysis, design reviews, and method statement evaluation.

### Quality Review

Independent QA/QC for construction works, technical submittals, and engineering documentation.

*"Our work spans rural roads, bridges, irrigation systems, and agricultural infrastructure, from feasibility through commissioning."*

## Transparency that builds trust with donors, governments, and investors.

We help organizations meet the financial reporting standards of international development partners, and build the internal capacity to sustain them.

### Accounting

Financial statements, bookkeeping, chart-of-accounts design, and compliance with local and donor standards.

### Governance

Policy development, internal controls, segregation of duties, and regulatory compliance advisory.

### Reporting

Donor-aligned financial reports, KPI tracking, program dashboards, and audit preparation.

Programs we support are funded by: World Bank · AFD · IFAD · USAID · European Union

## Digital systems that make programs operate at scale.

We design and deploy digital infrastructure that allows public agencies and development partners to manage complex programs efficiently.

### Digital Infrastructure

Cloud architecture, on-premises systems, and secure environment design tailored to operational needs in West Africa.

### Data Management

Data architecture, storage optimization, governance frameworks, and backup solutions.

### Networking

Connectivity solutions, enterprise communication systems, and resilient digital infrastructure.

---

*We close the gap between international best-practice tooling and practical implementation in low-bandwidth, resource-constrained environments.*

## THE TEAM

### Aboubacar Konate

#### Principal Engineering Consultant

Bridge engineer (HDR, VHB). 7+ years of bridge inspection, load-rating, and structural design. Born in Kouroussa, Guinea. BSCE, University of New Hampshire.

### N'faly Kaba

#### Financial Senior Associate

Former KPMG Deal Advisory Senior Associate (6 years). Deep expertise in audit, due diligence, and financial controls across healthcare, energy, and finance sectors. Born in Conakry, Guinea.

### Joël Nkounkou

#### Technical Development & Advancement

Product and technology leader (Meta, Intel, Tive). Co-founder of ecoText. Specialist in IoT, SaaS, and digital operations. Born in Brazzaville, Congo.

### Alioune Touré

#### Advisor

35+ years in rural engineering across Guinea. Directed 600+ km of rural roads and 180 m of bridges for AFD/Ministry of Agriculture. Trained at Julius N'Yéréké Polytechnic Institute, Kankan.

## Financial Transparency & Governance

World-class audit, risk advisory, and compliance services tailored to African markets and international donor standards.

## Sector-Specific Consulting

Deep expertise across engineering, finance, and technology, applied to the specific regulatory and operational realities of West Africa.

## Capacity Building

Training the next generation of African professionals and collaborating with local institutions for resilient, sustainable results.

**Built from the diaspora. Built for the continent.**
